Overview

The pages of *Arthritiswebsite* are cross-referenced to several other organizations, such as the US Government's clinical trial page at <http://clinicaltrials.gov/ct/gui/c/b>. However, this website's main characteristic is that it is friendly to users who might find it difficult to scroll through pages to locate the resources they need. *Arthritiswebsite* eases this task by using large typeface for text and single-page visualization.

Other comments

The site has received several Internet publishing awards for design, and those in the rheumatology community who have or are considering establishing their own arthritis websites may want to visit *Arthritiswebsite* for some pointers.
